Accomplishments within type 2-diabetes, obesity and cardiometabolic diseases

2017 will mark the 10th anniversary of the European Research Council, which was set-up by the European Commission in 2007. To celebrate the success of all scientifical breakthroughs and discoveries an “ERC week” will take place from 13 to 19 March all over Europe. Lund University Diabetes Centre welcomes all to listen to the advances of our own six laureates.

Monday March 13, 13.00-16.30.
Jubileumsaulan, Jan Waldenströms gata 1, sjukhusområdet i Malmö

13.00 Introduction by Hindrik Mulder, moderator

Towards precision medicine in diabetes
Leif Groop, professor, diabetes and endocrinology

Water and fat sensitive hormones in cardiometabolic disease
Olle Melander, professor, cardiovascular diseases

Towards a unifying mechanistic theory of heart failure and effective therapy
Gustav Smith, associate professor, cardiology

Pause

Connection between genetic and circulating biomarkers, diet and gut microbiota in cardiometabolic disease and cancer
Marju Orho-Melander, professor, genetic epidemiology

Precision lifestyle medicine in obesity and type 2 diabetes
Paul Franks, professor, genetic epidemiology

Pancreatic Islet dysfunction and Type 2 diabetes – Beyond the genome
Charlotte Ling, professor, diabetes research
